EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE Claims

Claim 6, line 16, the word "wall" has been amended to the word -- walls --.

Claim 12, line 4, the word "claims" has been amended to the word -- claim --.

Claim 13, line 1, the word "(Amended)" has been amended to the words -- (Currently amended) --.

Claim 14, line 1, the word "(Amended)" has been amended to the words -- (Currently amended) --.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **1-5** are allowable over the prior art of record because the prior art does not teach or suggest a process of manufacturing a wiring board, said process

Art Unit: 1753

comprising the steps of making, coating, electroplating and polishing as presently claimed, esp., the step of making a resin plate which has wiring pattern recesses with inner walls therein and via through holes using a pair of molds.

Claims **6-8** are allowable over the prior art of record because the prior art does not teach or suggest a process for manufacturing a multi-layer wiring board, said process comprising the steps of (a) manufacturing, (b) forming, (c) coating, (d) electroplating and (e) polishing as presently claimed, esp., the step of making a resin plate having wiring pattern recesses with inner walls therein and having via through holes using a pair of molds.

Claims **9-13** are allowable over the prior art of record because the prior art does not teach or suggest a process for manufacturing a wiring board, said process comprising the steps of (a) preparing, (b) forming, (c) coating, (d) electroplating and (e) polishing as presently claimed, esp., the step of forming said resin layer with wiring pattern recesses having inner walls and with via through holes using a mold.

Claim **14** is allowable over the prior art of record because the prior art does not teach or suggest a process for manufacturing a multi-layer wiring board, said process comprising the steps of (a) preparing, (b) forming, (c) coating, (d) electroplating and (e) polishing as presently claimed, esp., the step of (a) preparing a wiring board which is made in accordance with the steps defined in claim 9.

The prior art does not contain any language that teaches or suggests the above. *Odaira et al.* does not teach using a mold to form wiring pattern recesses having inner

walls and via through holes in the resin. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
